

SEAFARER[®]

SEAFARER OVERSEAS VALUE FUND

Portfolio Briefing

First Quarter 2024

Sources of Value

Seafarer has identified seven distinct sources of value in emerging markets that may give rise to viable opportunities for long-term, value-oriented investments.

Opportunity Sets	Source of Value	
Balance Sheet	Balance Sheet Liquidity	Cash or highly liquid assets undervalued by the market
	Breakup Value	Assets whose liquidation value exceeds their market capitalization
	Management Change	Assets that would become substantially more productive under a new owner / operator
	Deleveraging	Shift of cash flow accrual from debt holders to equity holders
	Asset Productivity	Cyclical downturn following a period of asset expansion
	Structural Shift	Shift to a lower growth regime, but still highly cash generative
Income Statement / Cash Flow	Segregated Market	Productive, cash-generative assets trading in an illiquid public market

Investors should consider the investment objectives, risks, charges, and expenses carefully before making an investment decision. This and other information about the Funds are contained in the Prospectus, which may be obtained at www.seafarerfunds.com/prospectus or by calling (855) 732-9220. Please read the Prospectus carefully before you invest or send money.

Important Risks: An investment in the Funds involves risk, including possible loss of principal. International investing involves additional risks, including social and political instability, market and currency volatility, market illiquidity, and reduced regulation. Emerging markets are often more volatile than developed markets, and investing in emerging markets involves greater risks. Fixed income investments are subject to additional risks, including but not limited to interest rate, credit, and inflation risks. Value investments are subject to the risk that their intrinsic value may not be recognized by the broad market. An investment in the Funds should be considered a long-term investment.

The performance data quoted represents past performance and does not guarantee future results. Future returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost.
