### Investment Objective

The Fund seeks to provide long-term capital appreciation along with some current income; it also seeks to mitigate adverse volatility in returns.

### Strategy

The Fund invests primarily in the securities of companies located in developing countries. The Fund invests in several asset classes including dividend-paying common stocks, preferred stocks, and fixed-income securities.

The Fund seeks to offer investors a relatively stable means of participating in developing countries' growth prospects, while attempting to mitigate adverse volatility in returns.

The Fund utilizes bottom-up security selection to construct a portfolio that offers a broad balance between prospective growth and current cash flow. In striking the tradeoff between growth and income, the Fund seeks a wide range of securities across three portfolio components, as defined below.

### Portfolio Components

Core Holdings	Moderately underappreciated growth	Moderately elevated current yield
Growth Holdings	Higher growth potential	Lower current yield

**Important Risks:** An investment in the Funds involves risk, including possible loss of principal. International investing involves additional risks, including social and political instability, market and currency volatility, market illiquidity, and reduced regulation. Emerging markets are often more volatile than developed markets, and investing in emerging markets involves greater risks. Fixed income investments are subject to additional risks, including but not limited to interest rate, credit, and inflation risks. Value investments are subject to the risk that their intrinsic value may not be recognized by the broad market. An investment in the Funds should be considered a long-term investment.

## Investment Philosophy

Seafarer believes that disciplined active management, based on fundamental analysis and applied over a long-term horizon, can enhance investment performance and mitigate portfolio volatility. Developing markets exhibit structural inefficiencies, primarily associated with liquidity premiums and asymmetric information, that can give rise to persistent mispricing of individual securities. Bottom-up, fundamental research on individual companies is the best means by which to capitalize on inefficiencies in developing markets over long-term horizons.

**Alpha** is the excess return of a portfolio after controlling for systematic (market-based) risk. **ADR** is a receipt for shares of a foreign-based corporation held by a U.S. bank. **Beta** is the systematic risk (variance) of a portfolio measured relative to the market as a whole (or a proxy index). **Distribution Yield** is the sum of the Fund's income distributions during the trailing 380 days divided by the previous month's NAV (adjusted for any capital distributions). **Earnings Per Share (EPS)** is company profit (attributable to common stockholders) divided by common shares outstanding. **Price to Book Value (P/B) Ratio** is stock price divided by book value per share. **Price to Earnings (P/E) Ratio** is stock price divided by EPS. **R-squared** is a measure of the variance in a portfolio's return that can be explained by movements in the overall market (or a proxy index). **30-Day SEC Yield** is net investment income earned by the Fund over a 30-day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period.

**1.** Seafarer Capital Partners, LLC has agreed contractually to waive and/or reimburse fees or expenses in order to limit Total Annual Fund Operating Expenses After Fee Waiver/Expense Reimbursements (inclusive of acquired fund fees and expenses, and exclusive of brokerage expenses, interest expenses, taxes and extraordinary expenses) to 1.15% and 1.05% of the Fund's average daily net assets for the Investor and Institutional share classes, respectively. This agreement is in effect through August 31, 2020. **2.** Excludes short-term government bonds; includes medium- and long-term government bonds. **3.** Excludes all government bonds. **4.** Gross Portfolio Yield is the gross yield for the underlying portfolio, estimated based on the dividend yield for common and preferred stocks and yield to maturity for bonds. This measure of yield does not account for offsetting Fund expenses and other costs, and consequently it should not be construed as the yield that an investor in the Fund would receive. **5.** Calculated as a harmonic average of the underlying portfolio holdings. **6.** Based on consensus earnings estimates for next year. **7.** Active Share is a measure of a portfolio's deviation from a benchmark index, where a value of 0% indicates that a portfolio is a perfect replica of the index, and a value of 100% indicates that a portfolio is entirely different than the index. **8.** The MSCI Emerging Markets Total Return Index, Standard (Large+Mid Cap) Core, Gross (dividends reinvested), USD is a free float-adjusted market capitalization index designed to measure equity market performance of emerging markets. Index code: GDUEEGF. It is not possible to invest directly in an index. **9.** As of 3/1/12. The Fund's inception date is 2/15/12 but Morningstar data is only available as of the beginning of the following month. **10.** The S&P 500 Total Return Index is a stock market index based on the market capitalizations of 500 large companies with common stock listed on the NYSE or NASDAQ. It is not possible to invest directly in an index. **11.** Upside Capture Ratio is a measure of the average extent to which a fund rose with its benchmark index, conditional upon months during which the index rose. A measurement of 100% indicates the fund rose in perfect tandem with the index. **12.** Downside Capture Ratio is a measure of the average extent to which a fund declined with its benchmark index, conditional upon months during which the index declined. A measurement of 100% indicates the fund declined in perfect tandem with the index. **13.** Core Holdings: moderately underappreciated growth; moderately elevated current yield. Growth Holdings: higher growth potential; lower current yield. Value Holdings: lower growth potential; higher current yield. **14.** Yield is the dividend yield for common and preferred stocks and yield to maturity for bonds. **15.** USD and Foreign Currency. ©2019 Seafarer Capital Partners, LLC ~ SEA000903
